

# REPUBLICA DE LAS PLANTAS

A GARDEN OF FREEDOM  
WHERE NATURE RULES

Republica de las Plantas is a visionary garden that redefines the relationship between humans and the natural world, placing nature first and humans second. This is a sanctuary where nature reigns supreme, reclaiming its space and expressing its untamed beauty through a vibrant tapestry of plants, fungi and fauna. Here, the plant kingdom grows freely, unhindered by human control, embodying the essence of freedom and resilience.

Visitors are invited to step into a living wonderland, where they can immerse themselves in the art of nature—walking through lush, organic pathways, sitting on natural forms, and reconnecting with the roots of the earth. Republica de las Plantas celebrates the magic of coexisting with living organisms, showcasing how humans can collaborate with nature to create beauty and harmony. It is a tangible, sensory experience that invites every being to feel as free as nature itself, fostering a profound appreciation for the flora, fauna, and ecosystems that sustain us.

The design emphasizes sustainable coexistence, using living materials and ecological principles to demonstrate how humans can build with nature's power. This is a place where nature's rules govern, and humans are invited to experience freedom alongside it—a space to simply be, as free as the plants and creatures that thrive within.
